

Prayer Request for the Ju/'hoansi Bushmen of North Eastern Namibia and Botswana. **(Tsumkwe Aree in Namibia and Mohopa in Botswana)**

Background

The Ju/'hoansi Bushmen is the biggest, and one of 5 ethnic Bushmen groups in Namibia. The largest number of them, about 3500 stays in the Tsumkwe area with smaller communities located in Ekoka in the Caprivi and near Gobabis. A small community of them can also be found in Dobe In Eastern Botswana. . Due to their complicated language, with its various dialects, and their unique culture only a small percentage of them has been reached with the gospel. Only portions of the Bible has been translated in the Ju'hoan language. The Bible has been translated in the Kung language, another dialect, but it is not available in print. The Bushmen is by far the smallest ethnic group in Namibia and totals 1,3% of the population. The Bushmen number about 30000 people in total in Namibia (2006 census). This leaves them, as well as those that works amongst them with very unique challenges. Following are a few prayer requests for the Ju/'hoansi Bushmen but it is also applicable to other Bushmen groups.

Prayer Requests

Alcohol misuse is a big problem amongst all age and ethnic groups in the Tsumkwe area. One reason for this is the availibility of liquor as the sale of it creates revenue for many people. Pray that people will be delivered from dependency and that negative behavior patterns that result from the abuse of alcohol will be broken.

Unemployment is also a big problem. Pray for existing income generating projects to be successful and sustainable and for the Bushmen to utilize these opportunities to their full benefit and wellbeing.

TB, Malaria and HIV/Aids is prevalent in the area with HIV/Aids on the increase. Pray for the effective service delivery to people with HIV/Aids TB and malaria as well as for the education and prevention programmes which are in place. Pray that the people will grasp the importance of what they learn in these programmes and start doing the practical hints they receive. Pray for the sick and dying. Pray for those looking after them, often far in the bush.

School attendance is poor amongst Bushmen children. This results from poor parental guidance and control as well as abuse by children from other ethnic groups. The smaller sized Bushmen are an easy target . Pray that parents will once again take up their responsibilities and that they will discover their role as parents.

The Bushmen are often victimized by other ethnic groups that "invade" their community and land without any respect for them. Stock theft also occurs as other groups steal from them. Efforts by Bushmen community leaders are often falling on deaf ears. Pray that other ethnic groups will respect the Bushmen, their land and their property and that they will not be seen as outcasts by society. Pray that the Bushmen will have favor with Government and other organizations that render assistance to them.

The Bushmen are very dependant on handouts and sometimes believe the world owes them something. This prevents them from discovering and developing their own potential and gifts. Pray that a sense of self pride will be restored and that they will understand that they need to, and that they can, shape their own destiny.

Pray for the Christian believers amongst the Ju/'hoansi Bushmen, that they will grow in Christ and be able to withstand the temptations of everyday day life, and their unique culture. Pray that they will be able to discern the perfect will of God for their lives and that they will discern what is wrong and right. Pray that they will become witnesses in their own community.

Pray for DEGNOS in Grootfontein, a Service and Witness centre of the Dutch Reformed Church in the North Eastern part of Namibia that train, and work amongst the Ju/'hoansi Bushmen, as well as amongst the other Bushmen groups in the north eastern parts of Namibia.
